

Porsche 911 GT3

08/04/2009 05:03 by ramas

The racing 911 GT3 was originally manufactured in the years 1999-2000. The second generation of this model appeared in Geneva at the beginning of 2003. In its current form, the GT3 remains a 2-seat racing vehicle designed for car racing. The car is driven by a 3.6-liter engine of 381 hp which, via a 6-speed manual gearbox, drives the rear wheels. It accelerates to 100 km/h in 4.5 seconds, and has a maximum speed of 306 km/h. Like the GT2 model, this racing vehicle is also approved for driving on public roads.
